## Instructions

There are 14 questions on this examination paper. Answer **all** questions.

Questions do not necessarily carry equal marks. To help you manage your time during this examination, a maximum time for each question is suggested. If you remain within these times you should have about 10 minutes left to review your work.

Write your answers in the spaces provided in this booklet. You may lose marks if you do not do so. There is space for extra work at the back of the booklet. You may also ask the superintendent for more paper. Label any extra work clearly with the question number and part.

The superintendent will give you a copy of the *Formulae and Tables* booklet. You must return it at the end of the examination. You are not allowed to bring your own copy into the examination.

You may lose marks if your solutions do not include supporting work.

You may lose marks if you do not include the appropriate units of measurement, where relevant.

You may lose marks if you do not give your answers in simplest form, where relevant.

Write the make and model of your calculator(s) here:

**Question 4**

**(Suggested maximum time: 10 minutes)**

The table shows the number of text messages Conor sent each day for two weeks.

18	18	19	19	19	23	24
26	26	28	31	32	33	59

**(a)** Fill in the **stem and leaf** plot to show this information.

1						
2						
3						
4						
5						

Key: 

1		8
---	--	---

 = 18 text messages

**Question 6****(Suggested maximum time: 5 minutes)**

Keith's gross income is €420 per week. Keith pays income tax at a rate of 20%.

- (a)** Work out Keith's gross tax per week.

Gross Tax = $0.20 \times €420 =$									

Keith has a tax credit of €65 per week.

- (b)** Work out Keith's net tax per week.

Net Tax = Gross Tax – Tax Credit									

- (c)** Work out Keith's net income per week.

Net Income = Gross Income – Net Tax									

**Question 7**

**(Suggested maximum time: 5 minutes)**

The diagram below shows the sets  $A$ ,  $B$ , and  $U$ .

- (a) Put a tick ( $\checkmark$ ) in the correct box to show what kind of diagram this is.  
Tick **one** box only.

Tree diagram

Venn diagram

Pie diagram

- (b) Put a tick ( $\checkmark$ ) in the correct box to show which set has **exactly 2 elements**.  
Tick **one** box only.

$A \cup B$

$A$

$A \cap B$

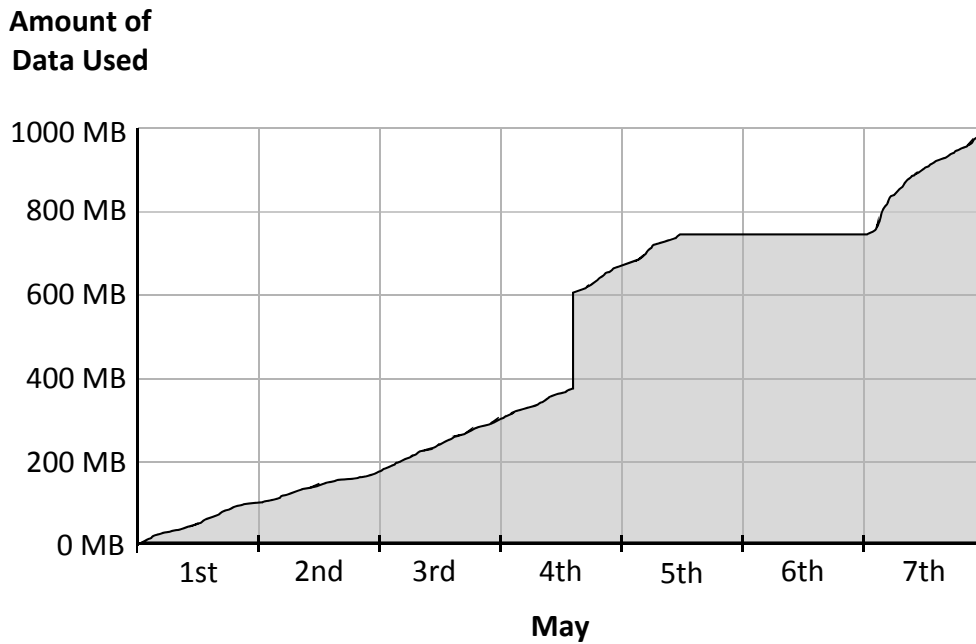

- (c) List the elements in the set  $B$ .

$B = \{ \hspace{10em} \}$

**Question 8**

**(Suggested maximum time: 5 minutes)**

The diagram below shows the amount of data that Ava used on her phone over the first 7 days in May. She used 1000 MB in total in this time.

Use the diagram to complete the table below by filling in the missing number and dates.

Description	Number or date
The number of MB of data Ava had used by the end of 2nd May.	
The date when Ava used the most data.	
The date when Ava didn't use any data.	

**Question 9**

**(Suggested maximum time: 10 minutes)**

**(a)** The diagram below shows two lines. Four angles are labelled.

Complete the sentences below by writing a correct letter, *A*, *B*, or *C*, into each box.

**Sentence 1:** “The angles *D* and  are **the same size.**”

**Sentence 2:** “The angles *D* and  **add to 180°.**”

**(b)** **Construct the axis of symmetry** of the isosceles triangle below, by **bisecting** the correct angle **or** the correct side.

You may use only a compass and straight edge. Show all of your construction lines clearly.

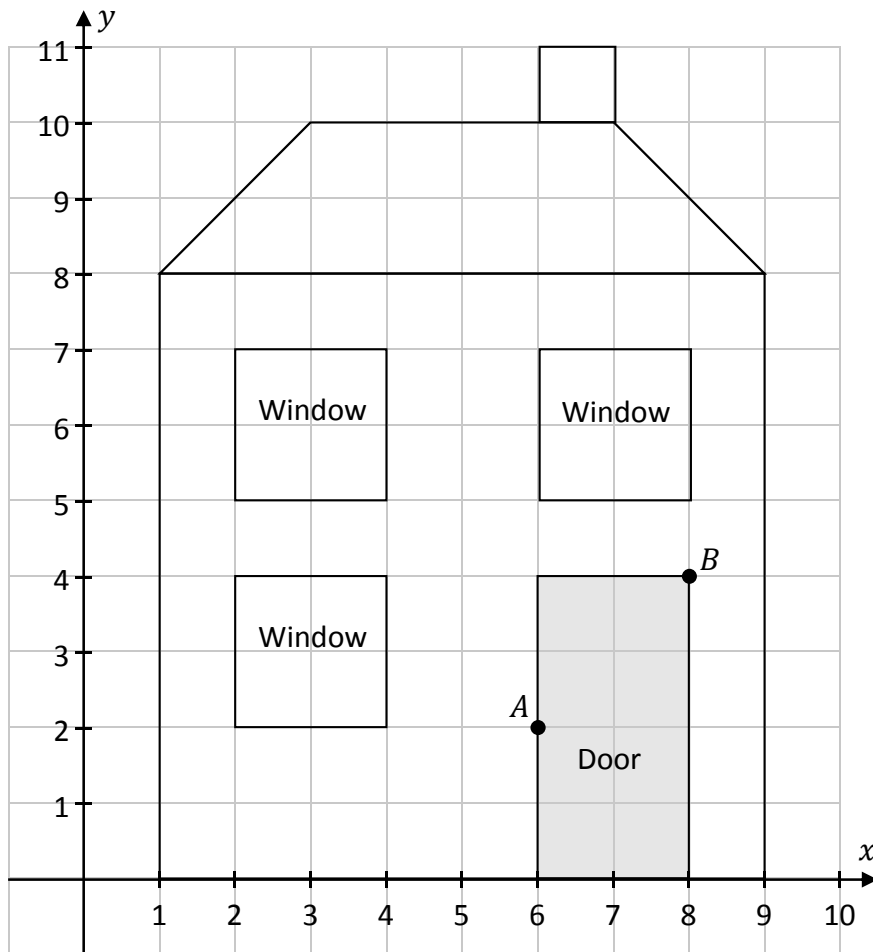

**Question 10**

**(Suggested maximum time: 15 minutes)**

The diagram shows a sketch of Joan’s house on a co-ordinate grid.

Each small square on the grid has a side of length 1 cm. The points *A* and *B* are also shown.

- (a) There is a cracked tile on the roof at  $D(4, 9)$ .  
**Plot** the point  $D(4, 9)$  on the co-ordinate diagram. **Label** the point  $D$ .

- (b) Write down the co-ordinates of  $A$  and  $B$ .

$A =$

$B =$

- (c) There is a knocker half way between  $A$  and  $B$ .  
Find the co-ordinates of the **midpoint** of  $[AB]$ .

Midpoint = 

	,	
--	---	--

- (d) Write down the height and the width of the **door** in the sketch. Give each answer in cm.

Height = 

--

 cm

Width = 

--

 cm

- (e) Work out the **area** of the door in the sketch, in  $\text{cm}^2$ .

- (f) The sketch is to a scale of **1 cm = 0.5 m**.  
Work out the actual height and actual width of the door, in metres.

Actual height = 

--

 m

Actual width = 

--

 m

*This question continues on the next page.*

**Question 13**

**(Suggested maximum time: 15 minutes)**

Dominik has a sore throat. He buys a bottle with 160 ml of medicine in it. He takes 20 ml of the medicine each day.

- (a) Fill in the table below, showing the amount of medicine left in the bottle at the end of each day for the first 5 days.

Day	1	2	3	4	5
Amount of medicine left in the bottle (in ml)	140	120			

- (b) Plot the points from the table on the diagram below. The first two are already done.

**Question 14**

**(Suggested maximum time: 15 minutes)**

- (a)** Put a tick (✓) in the correct box to show which type of triangle the Theorem of **Pythagoras** can **always** be applied to. Tick **one** box only.

equilateral

scalene

right-angled

Emma is going to use a rope to tie down a flagpole, as shown in the diagram below.

- (b)** The sizes of two angles are given in the diagram below.  
Find the size of the angle  $Y$ , the third angle in this triangle.

- (c) The flagpole is 4 m high. The length of the rope is  $x$ .  
Emma will tie the rope 2 m from the base of the flagpole, as shown in the diagram below.  
Use the Theorem of **Pythagoras** to work out the value of  $x$ , the length of the rope.  
Give your answer in metres, correct to one decimal place.

*This question continues on the next page.*

(d) The flagpole has a height of 4 metres.

(i) Write this height in **centimetres**.

4 m =  cm

(ii) The flagpole is in the shape of a cylinder.  
It has a radius of 6 cm.

Work out the volume of the flagpole.  
Give your answer in  $\text{cm}^3$ , in terms of  $\pi$ .
